

# BUTTERNUT SQUASH AMELIA

## PROCESSING HYBRID

- Good fruit uniformity
- Good yield potential
- Fruit size average: 2.0-2.2kg
- Excellent flesh quality

### Type

Processing-market butternut squash.

### Maturity

Medium-to-late: 95-100 days from sowing.

### Fruit Characteristics

Large, uniform fruits with a tan exterior.

### Plant Characteristics

Growth habit is vining.

### Features & Benefits

Amelia caters for the processing market with large, uniform fruits. The good flesh colour and texture contributes positively to the market segment requirements.

**Disclaimer:** This information is based on our observations and/or information from other sources. As crop performance depends on the interaction between the genetic potential of the seed, its physiological characteristics, and the environment, including management, we give no warranty express or implied, for the performance of crops relative to the information given nor do we accept any liability for any loss, direct or consequential, that may arise from whatsoever cause. Please read the Starke Ayres Standard Terms and Conditions of Sale before ordering seed.

**Resistance:** is the ability of a plant variety to restrict the growth and development of a specified pest or pathogen and/or the damage they cause when compared to susceptible plant varieties under similar environmental conditions and pest or pathogen pressure. Resistant varieties may exhibit some disease symptoms or damage under heavy pest or pathogen pressure (HR = High resistance, IR = Intermediate resistance).
