

LETTUCE ATLANTIS 2

LOLLO BIONDA LETTUCE

- Upright growth habit
- Good uniformity
- For year round production

Type

Lollo Bionda lettuce

Maturity

Approximately 30 days in summer and 30-50 days in winter (dependent on area and climate)

Plant Characteristics

Vigorous upright growth with good uniformity

Features & Benefits

Highly adaptable for year round production

Disclaimer: This information is based on our observations and/or information from other sources. As crop performance depends on the interaction between the genetic potential of the seed, its physiological characteristics, and the environment, including management, we give no warranty express or implied, for the performance of crops relative to the information given nor do we accept any liability for any loss, direct or consequential, that may arise from whatsoever cause. Please read the Starke Ayres Standard Terms and Conditions of Sale before ordering seed.

Resistance: is the ability of a plant variety to restrict the growth and development of a specified pest or pathogen and/or the damage they cause when compared to susceptible plant varieties under similar environmental conditions and pest or pathogen pressure. Resistant varieties may exhibit some disease symptoms or damage under heavy pest or pathogen pressure (HR = High resistance, IR = Intermediate resistance).
