

LETTUCE ROCKIN

CRISPHEAD LETTUCE FOR SUMMER AND SHOULDER SLOTS, BEST SUITED FOR HYDROPONIC PRODUCTION

- Best suited for hydroponics
- Quick maturing, harvest between 45 – 55 days
- Compact frame with medium sized heads
- Strong Bremia resistance (BL16 – 36 EU)
- Focused on pre-pack market

Type:

ROCKIN is a crisphead lettuce suited for open field but best suited for hydroponic production for the pre-pack market

Maturity:

45 - 55 days from transplant to harvest.

Plant Characteristics:

Compact frame with medium sized heads. Excellent uniformity with reduced ribbing and good internal quality.

Disease Resistance:

Strong Bremia resistance (BL16 – 36 EU).

Features & Benefits:

Produces high quality pre pack heads.

Disclaimer: This information is based on our observations and/or information from other sources. As crop performance depends on the interaction between the genetic potential of the seed, its physiological characteristics, and the environment, including management, we give no warranty express or implied, for the performance of crops relative to the information given nor do we accept any liability for any loss, direct or consequential, that may arise from whatsoever cause. Please read the Starke Ayres Standard Terms and Conditions of Sale before ordering seed.

Resistance: is the ability of a plant variety to restrict the growth and development of a specified pest or pathogen and/or the damage they cause when compared to susceptible plant varieties under similar environmental conditions and pest or pathogen pressure. Resistant varieties may exhibit some disease symptoms or damage under heavy pest or pathogen pressure (HR = High resistance, IR = Intermediate resistance).
