

SWISS CHARD STAR 1801

A HIGH YIELDING VARIETY WITH OUTSTANDING LEAF QUALITY

- Productive plant - high yield potential
- Thick leaves - increased shelf life
- Uniform plants - ease of harvest
- Low fibre in stem - easier to cut
- Dark green leaves - presents well on shelf

Type

STAR 1801 is a frilly leafed Swiss chard.

Maturity

40 - 60 days after sowing depending on weather conditions.

Plant Characteristics

Very productive plants.
Large dark green leaves.
Low fibre white midrib.
Thick curled leaves for better shelf life.

Features & Benefits

Large and healthy leaves ideal for bunching.

Disclaimer: This information is based on our observations and/or information from other sources. As crop performance depends on the interaction between the genetic potential of the seed, its physiological characteristics, and the environment, including management, we give no warranty express or implied, for the performance of crops relative to the information given nor do we accept any liability for any loss, direct or consequential, that may arise from whatsoever cause. Please read the Starke Ayres Standard Terms and Conditions of Sale before ordering seed.

Resistance: is the ability of a plant variety to restrict the growth and development of a specified pest or pathogen and/or the damage they cause when compared to susceptible plant varieties under similar environmental conditions and pest or pathogen pressure. Resistant varieties may exhibit some disease symptoms or damage under heavy pest or pathogen pressure (HR = High resistance, IR = Intermediate resistance).
