

# CABBAGE STAR 3316

## AN ATTRACTIVE, FRESH MARKET HYBRID CABBAGE WITH A LARGE FRAME

- Large upright frame with excellent head protection
- Uniformly filled heads with firm internal texture
- High yield potential
- Medium to late maturing with good holdability
- Adaptable to summer and winter conditions

### Type

A high yielding hybrid cabbage for the fresh market.

### Maturity

Medium to late maturing. Approximately 90 - 95 days from transplant to maturity in summer. Maturity will vary by as much as 10 - 20 days between mid summer to mid winter plantings. Maturity is very uniform with a high first cut percentage.

### Plant Characteristics

A large plant with an upright leaf habit that provides excellent head protection. A plant population of 28,000 plants per ha is recommended for single head marketing, and 30,000 - 35,000 plants per ha for bagging.

**Head Characteristics:** STAR 3316 has very firm round to semi-globe shaped heads with an average head size (without frame leaves) of between 3 - 5 kg with an excellent flavour.

### Variety Characteristics

**Fertilization Guidelines:** The following is a guide to achieving optimal yields from this hybrid. Grower conditions vary and a soil analysis is recommended prior to planting.

N: 150 to 200kg/ha. 70 to 90 kg/ha incorporated preplant. Top dress the balance 14,28 and 35 days after transplanting (no later). P: 50 kg/ha preplant. K: 120 kg/ha preplant. Soil pH: 6 - 6,8.

### Features & Benefits

The combination of early maturity, excellent Black Rot resistance in field and a vigorous seedling, contribute to the improvement in crop security that STAR 3316 offers the grower.

**Disease Resistance:** STAR 3316 has intermediate resistance to black rot as observed under field conditions.

**Disclaimer:** This information is based on our observations and/or information from other sources. As crop performance depends on the interaction between the genetic potential of the seed, its physiological characteristics, and the environment, including management, we give no warranty express or implied, for the performance of crops relative to the information given nor do we accept any liability for any loss, direct or consequential, that may arise from whatsoever cause. Please read the Starke Ayres Standard Terms and Conditions of Sale before ordering seed.

**Resistance:** is the ability of a plant variety to restrict the growth and development of a specified pest or pathogen and/or the damage they cause when compared to susceptible plant varieties under similar environmental conditions and pest or pathogen pressure. Resistant varieties may exhibit some disease symptoms or damage under heavy pest or pathogen pressure (HR = High resistance, IR = Intermediate resistance).
